SECURITY OF USERNAME AND PASSWORD

To access the Online Account Center and services, our Website uses a combination of a username and password to ensure the security of your account. You are responsible for keeping your username and password confidential. You acknowledge that we use your username and password to identify you when you log into our Website to access the Online Account Center and that protecting the confidentiality of your username and password is necessary to prevent unauthorized access to your account. TRANSACTION AUTHORIZATION

You agree that we are authorized to act on instructions received under your username and password unless you have previously notified us that your username and password have been compromised or used without your authorization. You are responsible for accurately entering all data to perform such transactions. You agree to hold us harmless for processing in good faith any request via the Online Account Center that we validate as being received from your username and password.

ACCOUNT BALANCE AND TRANSACTION HISTORY

You can use the Online Account Center to check the balance of your account and to view your transaction history. The balance shown for your account may include deposits subject to verification by us. Account balances shown may also differ from your records due to deposits in progress; outstanding transactions; or other withdrawals, payments, or charges. Account balances are updated periodically, and the Online Account Center will display the most current balance and transaction information available for your account.

VIRUS AND MALWARE PROTECTION

We are not responsible for the effects of any electronic viruses or other malware (e.g., trojans, root kits, etc.) that you may encounter and that may infect the computer you use to access the Online Account Center. We encourage you to routinely scan any computer you use to access the Online Account Center using a reputable anti-virus software product to detect and remove any viruses or other malware. If not detected and appropriately neutralized, viruses and malware may corrupt and destroy programs, files, and hardware and may store and transmit non-public, personal information from any such computer without your authorization.
